# Fill / Go

Application with fuel prices

# CHALLENGE

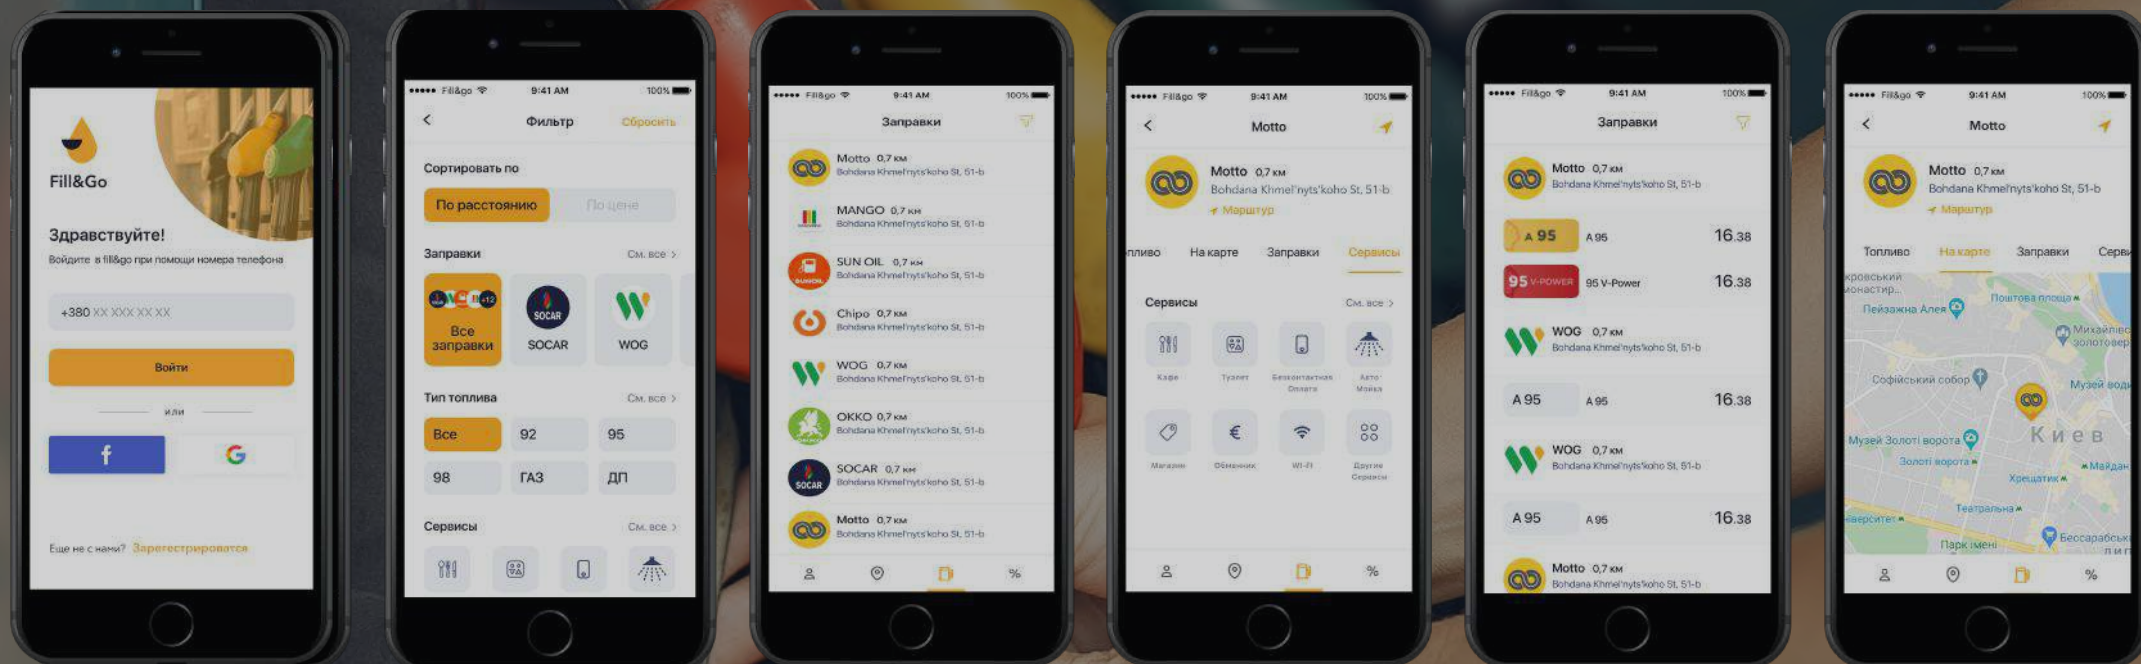

Combining all gas stations in Ukraine into one application, to make life easier for users by getting rid of a large number of cards for different gas stations. Provide regular users of road transport with information on the pricing policy of different gas stations, where the user can compare prices for different types of fuel at different gas stations.

# RESULT

An application in which you can add all the available plastic cards of gas stations, for easy scanning them later at gas stations

Display of all gas stations on the map and the ability to build a route to them, as well as information about the work schedule and services at each gas station.

# Club Catcher

A product to prevent golfers from leaving clubs behind on the golf course

IN

STATUS

OUT

STATUS

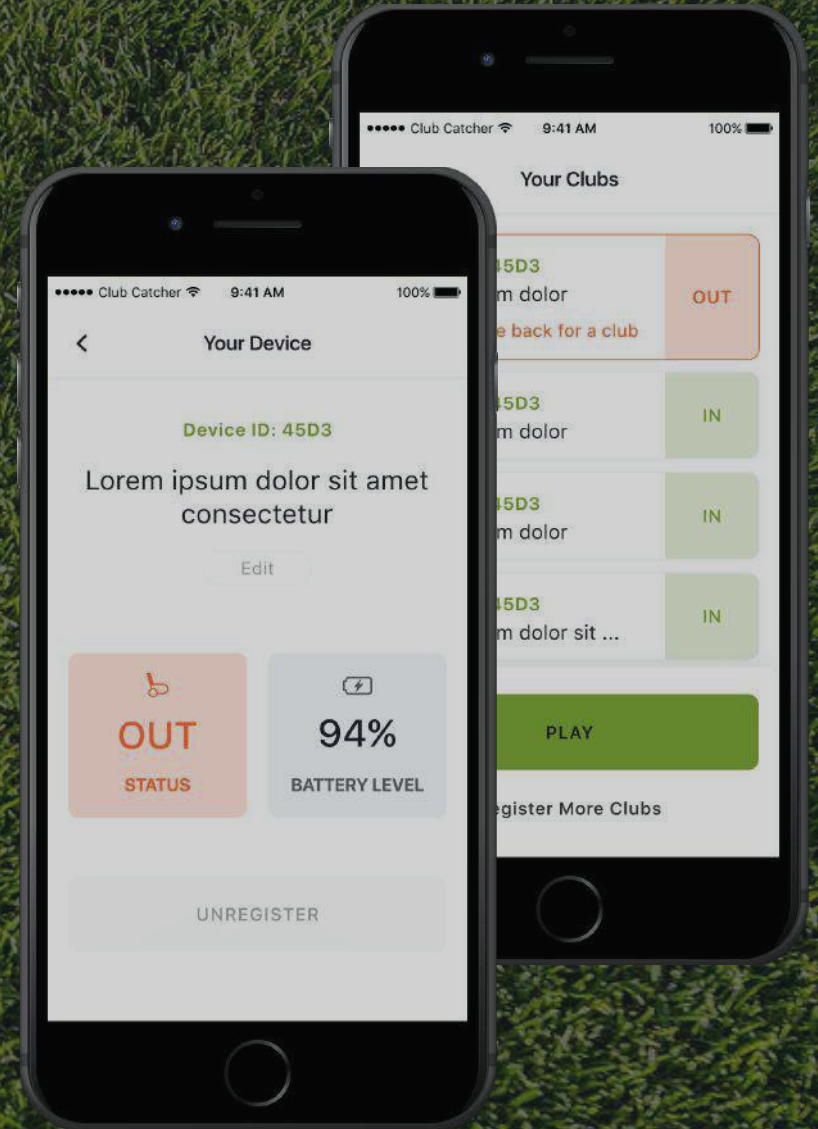

## PROBLEM

Losing a club means the hassle and expense of replacing the club. And some golfers, frustrated that they can't find the exact club to match their set, end up buying a whole new set.

Even in the case that you're able to go back and find your club on the course, it is a headache and embarrassment to make everyone wait for you while you go around to previous holes and bother other golfers as you look for it.

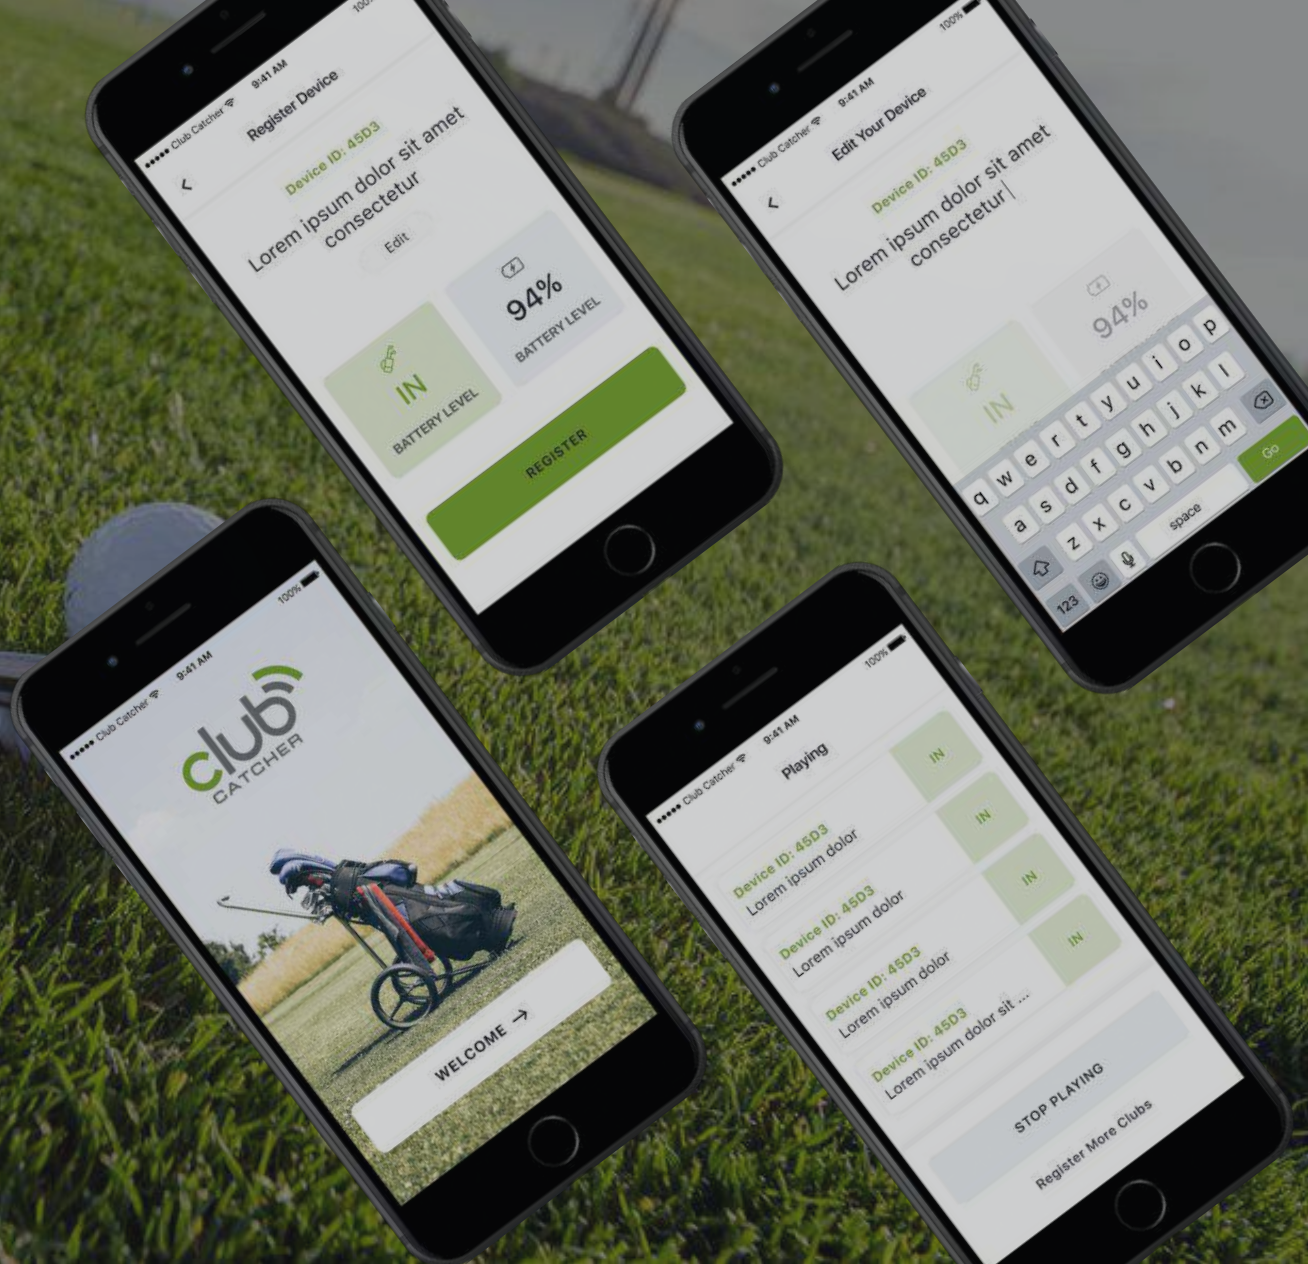

## CHALLENGE

Provide information about the club to regular golfers

## SOLUTIONS

Golf app that helps you register your club and monitor in real-time golf club status to avoid losing your club on the field
